- State-of-the-art software

MSI/PM PROGRAM HIGHLIGHTS

• Audit Features

In order for a claim to be processed the system will require:

- A specific Goal will be listed for each performed service
- A Medicaid Diagnostic Description must be selected
- A CPT Code must be selected
- Provider's certification must be current
- Provider notes must be present for each service performed
- The IEP must be current

The system will track and maintain the above in a single location which will eliminate lost records and provide each district enhanced management oversight and audit accountability.

- In the event of an audit, PracticeMax will work with our district clients and provide necessary and appropriate support to achieve optimum results.

• Unique Diagnostic Selection Process

The provider will select Medicaid Diagnostic descriptions through a unique drop-down selection process designed to promote accuracy, assure form completeness and reduce coding errors

- Claim submission and remittance advices are processed electronically

Increases speed and accuracy of claims, reduces claim rejections, and improves district cash flow from billings

- Reduced district staff time and involvement compared to other available solutions

All data required from the e-IEP PRO for billing is automatically loaded into the provider logs

• Improved program management and supervision

PracticeMax offers a broad spectrum of electronic (web-based) reports for districts to more effectively monitor and manage their Medicaid claims.

PracticeMax will in many cases be able to automate the manual reports that may districts are currently saving countless man-hours

- Up-to-date awareness of Federal and State legislative initiatives and proposed program changes that will effect district revenues, policies or procedures.
- State-of-the-art NextGen software (the medical industry's #1 rated billing & electronic medical record software)
